

# Cassettes – a system solution

Södra's cassettes are elements of wooden slats that are assembled to create a system solution, designed to save time and space in the workplace. The cassettes contribute to efficient and simple installation, while also giving a clean and attractive impression.

## Offer

Södra offers cassettes adapted to function and customer requirements. As a result, their appearance can vary based on the type of wood, lengths, dimensions and need for insulation.

## Advantages

- + Saves time and space in the workplace
- + Efficient and easy installation

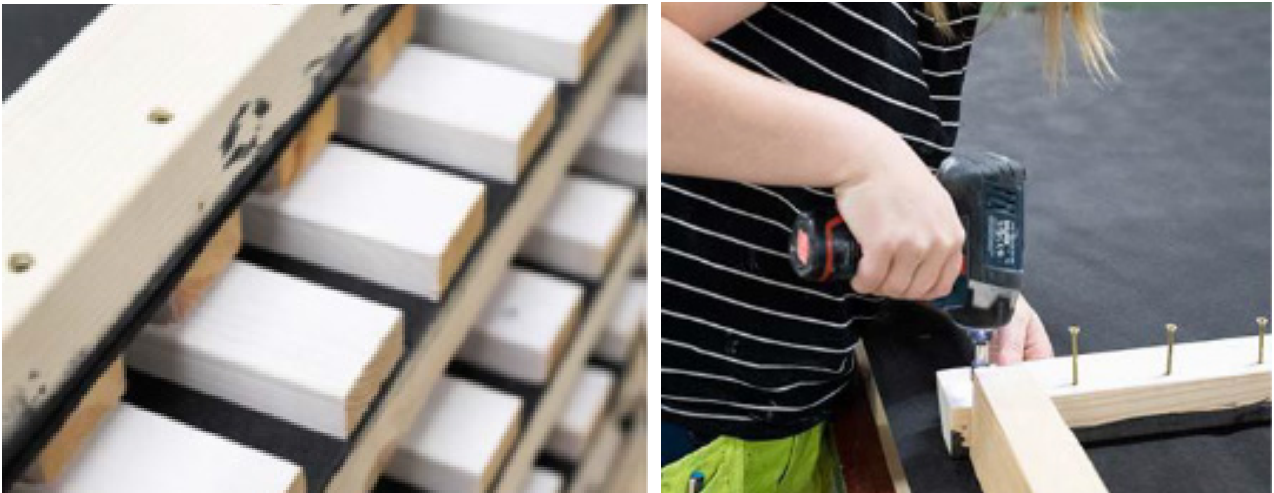

## Installation

The suspension method depends on conditions in the workplace and whether or not the element is supplied separately. The method is decided in consultation between Södra and the customer prior to pre-installation, in order to avoid any unnecessary complications.
